🌟 ELAKIYAA — Client & Workforce Management System

Live on Vercel | React 19 | Vite 8 | Tailwind CSS 3.4

📌 1. Executive Summary

ELAKIYAA Client & Workforce Management System is a production-ready enterprise solution built for **manpower staffing, client service tracking, and distributed shift management**. Customized for oil & gas retail networks (Indian Oil, Bharat Petroleum, Hindustan Petroleum, Shell, Nayara) and enterprise service providers, it unifies **Admin governance, Manager supervision, Staff operational reporting, and Client transparency** into a seamless, high-performance web platform.

🏢 2. Business Problem & Solution

Traditional Industry Challenges	ELAKIYAA Enterprise Solution
Buddy Punching & False Attendance	**Biometric Camera & Geo-Stamped Attendance** — Real-time front-camera capture with embedded GPS coordinates, address, and tamper-proof timestamp overlay on HTML5 canvas.
Disconnected Task Allocations	**Multi-Entity Task Engine** — Bulk task assignments across multiple staff members and multiple client stations simultaneously.
Lack of Client Visibility	**Dedicated Client Portal** — Real-time tracking of assigned staff, shift logs, official document downloads, and service request tracking.
Slow Payroll & Leave Processing	**Automated Payroll & Leave System** — Leave approval chains with automatic status propagation and detailed salary slip generation (basic, allowances, deductions, net).
Zero Audit Accountability	**Immutable Audit Trail** — Automatic timestamped logging of every critical administrative action, attendance correction, and role update.

👥 3. Role-Based Portals & Key Features

👑 1. Admin Portal (/admin)

- **Executive Dashboard**: Workforce KPIs, attendance ratios, and bunk counts.
- **User Governance**: Search, filter, activate/deactivate accounts.
- **Staff & Manager Directory**: Direct telephonic calling and branch assignments.
- **Multi-Entity Tasks**: Assign tasks across multiple staff and bunks simultaneously.
- **Attendance Control**: Daily punch-in verification with audit-logged edit modal.
- **Salary & Payroll**: Monthly net salary register and payment tracking.
- **Audit Logging**: Immutable security log of all system changes.

👔 2. Manager Portal (/manager)

- **Supervisory Dashboard**: Active team presence and pending approvals.
- **Staff Roster**: Inspection of staff assigned to manager with workload.
- **Bunk Inspection**: Station coverage, satisfaction, and shift monitoring.
- **Leave Authorization**: Approve/reject staff leaves and apply personal leave.
- **Work Allocation**: Assign tasks directly to team members with progress bars.

👷 3. Staff Portal (/staff)

- **Camera Punch In/Out**: Live camera capture with GPS stamp and 10:10 AM grace policy.
- **Task Execution**: Real-time progress slider (0% to 100%) and status updates.
- **Leave Requests**: Apply for sick, casual, or annual leave with manager alerts.
- **Digital Payslips**: View monthly salary breakdowns and deduction slips.
- **Documents Locker**: Access company letters, policies, and ID proofs.

🏢 4. Client Portal (/client)

- **Station Overview**: Real-time view of deployed workforce on site.
- **Duty Confirmation**: 1-click confirmation acknowledging on-duty staff.
- **Direct Calling**: One-touch phone calling to assigned staff & supervisor.
- **Service Requests**: Raise tickets for extra staff, uniform, or equipment.
- **Document Repository**: Instant download of legal SLAs, invoices, and certificates.

🔑 4. Quick Demo Credentials (1-Click Login Ready)

On the live login page, you can click any of the 4 quick test credential pills to log in instantly:

Role	Demo User	Mobile Number	Password	Portal Route
👑 **Admin**	Arjun Sharma (System Admin)	9000000001	admin123	/admin

Role	Demo User	Mobile Number	Password	Portal Route
👔 **Manager**	Priya Nair (Operations Lead)	9000000002	manager123	/manager
👷 **Staff**	Anitha Devi (Senior Attendant)	9000000004	staff123	/staff
🏢 **Client**	Indian Oil Petrol Bunk (IOCL)	9100000001	client123	/client

🛠️ 5. Technology Stack & Architecture

- **Frontend**: React 19 (Pure Functional Components + Hooks)
- **Build Tool**: Vite 8 (Fast production bundling, ~2s builds)
- **Styling**: Tailwind CSS 3.4 (Mobile-first responsive design)
- **Icons**: Lucide React (Crisp modern SVG icons)
- **Cloud Backend**: Supabase (PostgreSQL Database Schema & Storage)
- **Deployment**: Vercel Cloud Platform (Continuous Deployment from GitHub)
